Profile

With 5 years experience, I am proficient in modern tools for design and Front End development using my expertise in responsive design and accessibility compliance to advocate for the User Experience.

Employment History

UI/UX Designer at Regulaition   Remote from Singapore

April 2023 – Present

- Collaborated with data scientists, developers, and C-suite executives to design Figma mockups that secured partnerships with Tquila and UIPath, worth millions in revenue.
- Spearheaded data visualisation design sessions, driving consensus among stakeholders and streamlining project progression through impactful wireframes and clickable prototypes.
- Championed the integration of Storybook and Figma, establishing a reusable Vuejs component library for improved UI design consistency and code maintainability across the team.
- Designed a design system built on Vuetify, enabling faster design iterations, development, and consistent product UI across diverse platforms.
- Tailored high-fidelity mockups for conference presentations, securing wider exposure and increased visibility for the product, resulting in new partnerships and expansion to the US market.
- Leveraged cross-functional team experience to interview and evaluate UX candidates, effectively identifying top talent based on design skills and collaborative abilities.

UI Developer at Immediate Media   London, England

February 2021 – March 2023

- Developed 10+ accessible, reusable React components in collaboration with UI designers, leveraging Storybook and mixins for scalability, resulting in a comprehensive component library.
- Collaboratively expanded registration user journey within Nextjs/Node.js micro-service through new routes and pages, ensuring comprehensive 100% test coverage across 50+ brands.
- Integrated paywall/data wall functionality for brands, including BBCGoodFood, by leveraging third-party services, resulting in increased subscriber engagement and delivered a seamless premium experience

- Contributed to code quality by conducting thorough peer code reviews and actively participating in comprehensive regression testing, ensuring the highest level of code integrity. Additionally, implemented a biweekly cross-browser behaviour monitoring process that achieved a minimum 95% test pass rate, significantly enhancing the overall reliability of the codebase.
- Co-created Women in Tech group with 4 leads, resulting in increased mentorship opportunities and improved work experience as well as participation in the Women in Tech Conference.
- Conducted interviews with over 10 developers and facilitated their onboarding through a comprehensive 5-part ticket-based exercise, fostering a deep understanding of the company's tech stack and driving significant improvements in team productivity.

Frontend UI Developer at Qhala   Nairobi, Kenya

March – November 2020

- Organised sprint planning sessions that resulted in faster iterations of feedback and consistent productivity of development.
- Developed frontend features of Jukua using Vue.js, including PWA functionality such as offline mode and easy installation on Android/Desktop.
- Achieved full responsiveness across multiple devices and fixed browser compatibility issues.
- Wrote E2E/Integration tests using Cypress.io, resulting in a more efficient debugging process.
- Consumed Restful API's with Axios to achieve CRUD functionality and used jwt tokens for a more secure user experience.
- Implemented Vuex state management across the platform that resulted in clean and scalable code.

Frontend Web Developer at BeMyGuest   Singapore

June 2019 – March 2020

- Restructured PHP form to Vue.js and achieved full responsiveness using LESS as part of a code refactoring task.
- Updated and wrote E2E/Integration Tests using Cypress increasing code coverage.
- Ensured accessibility result of 100% for White Label products on Google Lighthouse.
- Spearheaded the development of the company design system, resulting in faster and more efficient handovers between design and development teams, using Figma and Adobe Illustrator.
- Designed SaaS generated vouchers that serviced clients worth S$ 4.6M in revenue collectively.
- Produced voucher mockups for Art Science Museum that resulted in renewed contract worth SGD 200K in revenue.
